

SMART Meeting Pro™

connector for Microsoft® Lync®

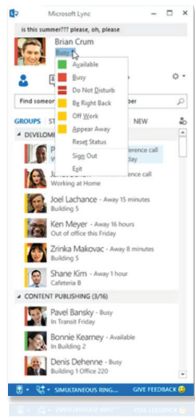

Experience connected collaboration and rich interactivity
– even if people are in different locations.

Bring together
Microsoft® Lync® 2013
with SMART's Meeting Pro
software and
interactive displays

Inspired Collaboration™

SMART®

The connectivity of Lync

Plus SMART's Meeting Pro software
and interactive displays

Equals powerful collaboration

Familiar Lync features

Use Microsoft Lync features that you already know, including the conversation window, Lync tool bar and stage area.

Digital ink

Write in digital ink on the whiteboarding space, or over any application, document or webpage. You and your remote colleagues can make notes for everyone to see in real time. Then save them in the native file format.

Easy whiteboarding

The Unbound Workspace gives you infinite space to whiteboard within, even if you're using large format file sizes. Plus, you have whiteboarding tools such as an image gallery, handwriting-to-text converter and a shape creator.

Capture notes

Save digital notes into any application and then send them out instantly. You'll have a comprehensive record of your meeting.

SMART Meeting Pro toolbar

Think of it as your control centre. This is where you can switch from whiteboarding to interacting with applications and websites.

Meeting start-up

To begin a meeting, just log in. SMART Meeting Pro loads automatically and your meeting details appear on-screen.
