

The world's #1 selling Lync Room System now supports inking over any application and offers even more sizes.

What you get with the SMART Room System that the competition can't match:

Interactive Sharing

No other Lync Room System allows you to ink on any application (including Microsoft® Excel® and Adobe®).

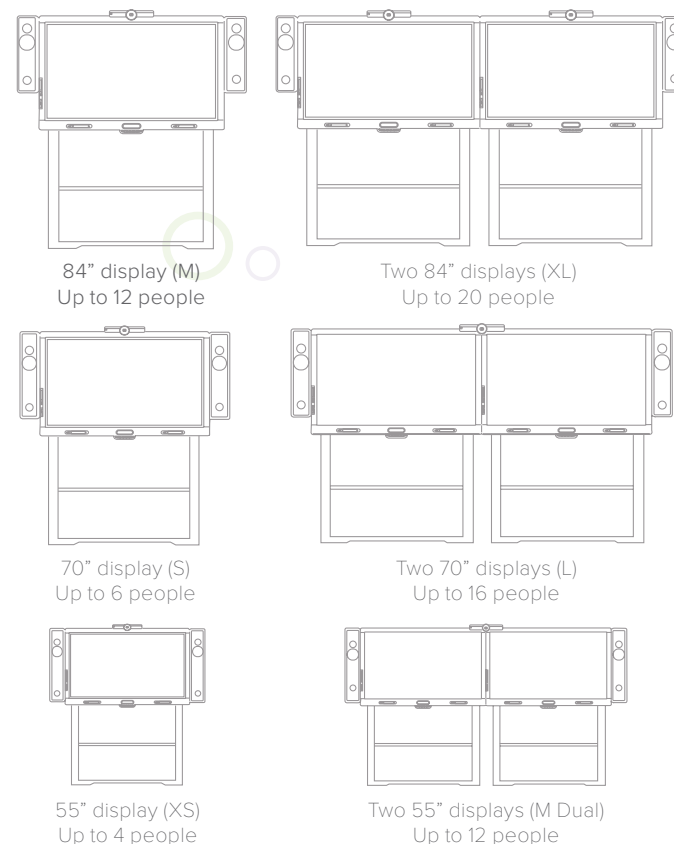

Six Sizes

The SMART Room System offers more size configurations than any other system in the market.

Seamless Integration

The SMART Room System is the only Lync Room System that is manufactured and supported by one vendor.

A right fit for any meeting room

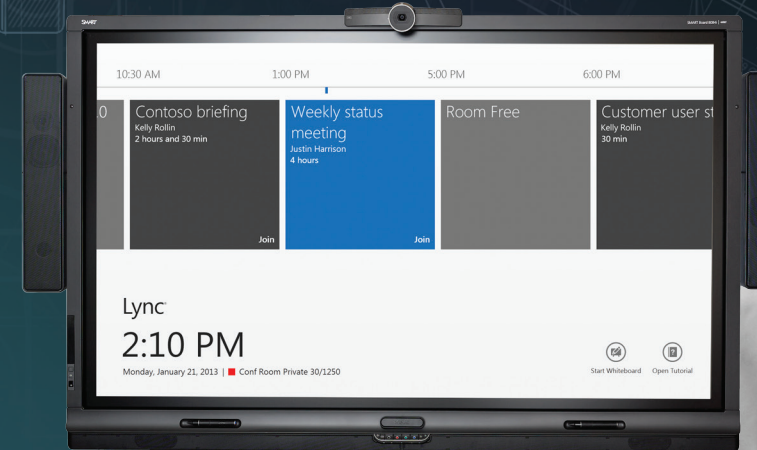

See it. Touch it. Experience it.

Experience the SMART Room System for yourself – it's the best way to understand how you can take collaboration sessions to the next level.

Why choose the SMART Room System?

Presence Detection

Built-in proximity detectors turn the displays on as soon as motion is sensed in the room, so it's ready for immediate use.

Industry-leading Displays

By choosing SMART, you're choosing the world leader in interactive displays. Stunning high definition resolution, low-glare, scratch-resistant glass and unmatched touch recognition combine to create a premium interactive experience.

Interactive Sharing

No other Lync Room System allows you to ink on any application (including Microsoft® Excel® and Adobe®) and have multitouch capability in these applications.

Immersive Audio

Up to 5 tabletop microphones can be connected, ensuring effective coverage, and integrated speakers offer high quality sound.

A camera for any environment

SMART's HD camera optimizes picture quality without the need for specialized lighting, window treatments or room management systems.

Panoramic Video

The ultra-wide 109° field of view offers a panoramic picture of the room without the need to adjust the camera, creating an immersive full-room video experience.

Object Awareness

SMART's proprietary touch and camera technology enables participants to switch seamlessly between a pen and finger, or to erase with a fist - all without having to return the pen to the tray.

Optional wall stand

An optional stand and cable routing system simplifies installation and eliminates the need for costly wall reinforcements.

Administrative Console

With its 11.6" display, the console has large touch points, which makes controlling the overall meeting easier without the need for a remote control.

A seamless experience

An integrated solution

Installation and maintenance are easier because all system components are manufactured and supported by one vendor: SMART Technologies.

Premium Services

Implementation and adoption consulting services ensure your SMART Room System is installed properly and is used effectively. Its reporting options give you detailed insight into system usage.

A more interactive experience

With 20 years of experience and dozens of patents on touch, SMART displays have multi-touch and gesture support enabled within Microsoft Lync.

Developed in partnership with Microsoft

Optimized for Lync

Tested and certified by Microsoft to ensure the best user experience.
